

Final Project Dataset

Variable Reference Card · Data Science for Healthcare
9,105 patients · 5 US medical centers · 1989–1994 · UCI ML Repository ID 880

The table below lists all variables in the dataset, grouped by category. No definitions are provided: understanding what each variable means is part of your work. Use this card as a map, not a glossary.

0 — Identifier

id	integer		
-----------	---------	--	--

1 — Demographic & Social

age	continuous	income	categorical (ordinal)
sex	categorical	edu	continuous
race	categorical		

2 — Diagnosis & Comorbidities

dzgroup	categorical	diabetes	binary
dzclass	categorical	dementia	binary
num.co	integer (ordinal)	ca	categorical

3 — Physiological Parameters (assessed at day 3 of study)

meanbp	continuous	sod	continuous
hrt	continuous	ph	continuous
resp	continuous	glucose	continuous
temp	continuous	bun	continuous
pafi	continuous	wbhc	continuous
alb	continuous	urine	continuous
bili	continuous	adlsc	continuous
crea	continuous	scoma	continuous

4 — Clinical Scores & Prognostic Estimates

sps	continuous	prg2m	continuous
aps	continuous	prg6m	continuous
surv2m	continuous	avtisst	continuous
surv6m	continuous		

5 — Decision & Care Process

dnr	binary	dnrday	continuous
------------	--------	---------------	------------

6 — Outcomes, Targets & Temporal Variables

death	binary	totmcst	continuous
--------------	--------	----------------	------------

hospdead	binary	charges	continuous
d.time	continuous	adls	continuous
slos	continuous	adlp	continuous
sfdm2	categorical (ordinal)	hday	continuous
totcst	continuous
